

**Question:**

**How do I control the audio volume?**

**Answer:**

Audio Control is being accomplished by the use of an external amplifier for the projection units in this Smart Classroom. The RCA model SA-155 Integrated Stereo Amplifier can control the sound quality from several input sources.

- 1) Turn the power ON using the power button on the left side of the face.
- 2) Adjust the volume level with the big knob on the right side of the front of the unit (see picture below).
- 3) Select **COMPUTER** for **COMPUTER VOLUME**
- 4) Select **VCR** for **VCR Volume**

- 5) If you are having problems with your volume control check the volume control settings on your computer.
- 6) If you are not receiving audio, make sure the VCR is turned on and that the power to the external amplifier is turned on. If this does not solve the problem, check to see if the connectors are tightly inserted into the back of the unit.

If you are unable to resolve the problem, please CALL THE HELP DESK AT **953-3375** to report the problem.
