

The Antoinette Family Home

A Real Story from a Local Charleston Habitat Homeowner....

I am so thankful to be a Habitat homeowner. After going through many transitions in my life, I found myself in need of affordable housing not only for myself, but also for my pride and joy...my daughter. While doing our sweat equity hours we got to know the Habitat staff, other homeowners, volunteers, and we overcame many obstacles. I know that I appreciate my home more than I ever thought possible because of all that I learned from being in the Habitat program. Habitat does not give out handouts; as Kelley Pruitt, Charleston Habitat's Family Services Coordinator would say, they give you a "hand up". I am proud to be a Habitat homeowner and pray that more deserving families are able to experience homeownership through this program.

Love,

Anita Antoinette, North Charleston
